

The value of financial advice

Data from a large survey of individuals and households has discovered that those who received financial advice subsequently ended up with, on average, **£13,424** more in financial assets and **£27,657** more in pension wealth than those who didn't receive advice.

Source: *The Value of Financial Advice (July 2017)* – a research report from the International Longevity Centre UK (sponsored by Royal London) drawing on data from the Wealth and Assets Survey which interviewed a large number of individuals and households across the UK about their ownership of assets, pensions, savings and debt. *These figures relate to individuals and households that received advice between 2001 and 2007 and the financial impact by 2012-2014.

The International Longevity Centre – UK (ILC-UK) is a futures organisation focussed on some of the biggest challenges facing Government and society in the context of demographic change. Asking difficult questions and presenting new solutions to the challenges and opportunities of ageing, they undertake research and policy analysis and create a forum for debate and action.

The value of investments and any income from them can go down as well as up and you may not get back the original amount invested. Past performance is not a guide to future performance and should not be relied upon.
